CORPORATE DESCRIPTION

James Kerr and Associates LLC (JKA) is a Small Business formed in 2003 and registered in System for Award Management (SAM) with Primary NAICS 541620 – Environmental Consulting Services; and NAICS 562910 Remediation Services.

JKA is a Subject Matter Expert (SME) for Environmental Site History (ESH) and Potentially Responsible Party (PRP) research, focusing on the nature and extent of site contamination and, where needed, linking specific site contamination to activities of past and current site entities. For over 18 years, JKA has successfully conducted this research for the USACE at FUDS, CERCLA, Munitions and FUSRAP sites.

JKA is comprised of individuals with extensive experience in Historical Site Research, PRP Research, and Environmental Support. JKA has developed an expertise and reputation in each of these service areas – with key JKA staff having over 30 years experience each managing and conducting this research for USACE Districts, USEPA Regions and several states, nationwide. JKA brings these experts together as JKA Independent Consultants for the purpose of continuing the kind of work they excel at and enjoy.

JKA comes from a background of PRP research and Liability Analysis where thorough research and a clear understanding of a site's operations and contamination history is critical. Where appropriate, our research includes review of site records, interviews with knowledgeable persons, title research, contract analysis, and thorough research at the National Archives and Records Administration and Federal Records Centers. Often, records about government-related activities that led to contamination at federal facilities can be found in archives. JKA is expert at working with archivists in uncovering that information. We have also performed this site history research for the USEPA at Superfund sites.

We are proud of the quality of our work; and we are good team players. We know how to develop an investigative plan and execute it in a manner that is cost effective and comprehensive. We understand the importance of the work we do and believe that we provide a valuable service at a great value to our clients. We understand that each site is unique in its needs and our experience allows us to work closely with the client to develop and execute historical research and report writing based on the available data and the needs of the client.

JKA has provided these ESH and PRP services to its Federal clients for over 18 years, as a Prime Contractor and as a Contract Team Member, and has done so with high customer satisfaction.
